

Doors That Do More: Why Facilities Rely on Rolling Steel Doors, Coiling Doors, and Security Grills

When it comes to securing, streamlining, and optimizing commercial and industrial facilities, the **right door solution makes all the difference**. Whether you're operating a busy distribution hub, a high-security storefront, or a temperature-sensitive warehouse, **coiling doors, rolling steel doors, and security grills** offer unmatched performance, flexibility, and long-term reliability.

At **CMH Industrial Systems**, these aren't just products—they're essential tools we install with precision, backed by decades of experience and a deep understanding of what our clients need. Let's explore coiling doors!

Coiling Doors: Compact, Clean, and Customizable

Coiling doors are the go-to solution for facilities where space efficiency is **key**.

Unlike sectional doors that require bulky overhead clearance, coiling doors roll **neatly into a compact barrel above the opening**—preserving valuable ceiling space for lights, sprinklers, HVAC systems, or crane equipment.

From insulated coiling doors that help regulate interior temperatures to high-speed models that keep traffic moving quickly and safely, **CMH Industrial Systems** offers fully **customized options** to match any industrial application.

These doors are not only practical—they're **built to last** in even the most demanding environments.

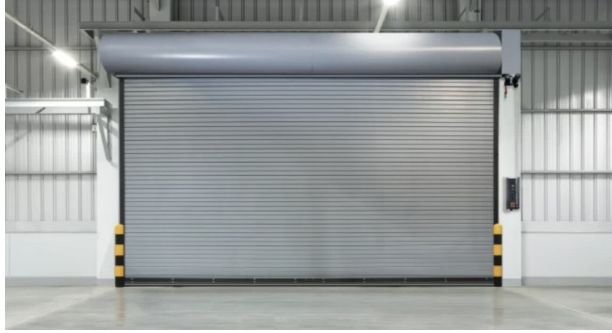

How Fast Do Coiling Doors Go?

When it comes to fast-paced environments like **warehouses, fire stations, and logistics hubs**, **speed matters**—and that's where **coiling doors shine**. Unlike traditional sectional doors, high-performance coiling doors can open and close in a matter of seconds, reducing wait times and keeping operations moving.

Many models operate at speeds of up to **24 inches per second**, minimizing air exchange, cutting down on energy loss, and helping maintain controlled environments.

The speed of coiling doors isn't just a nice-to-have—it's a **performance feature that pays off**.

Built Tough, Designed to Last

Rolling steel doors are engineered for durability, efficiency, and security. Made with interlocking slats of galvanized steel or aluminum, these doors roll up neatly into a coil, saving space while delivering heavy-duty protection. Whether you're securing a loading dock, warehouse, distribution center, or fire station, these doors offer **unmatched performance** in high-traffic, high-demand environments.

Our clients **CMH Industrial Systems** trust to deliver **rolling steel doors** that not only perform under pressure but do so with smooth, reliable operation. We help clients choose the **right materials, finishes, and optional features** to meet both operational and aesthetic goals.

Security Grills: Safe, Secure, and Sleek

Need security without losing visibility or airflow? **Rolling security grills** are an elegant solution. Designed for storefronts, parking garages, and indoor retail spaces, these **aluminum or steel grills** offer a strong barrier while maintaining line of sight. Whether you need a full-closure grille or a side-folding version, **CMH Industrial Systems** installs grill systems that are equal parts safety and style.

We've helped businesses across sectors protect their property while keeping spaces **open and inviting**. It's security without the sense of shutdown.

The CMH Industrial Systems Commitment

At **CMH Industrial Systems**, we don't just install doors—we deliver long-term solutions backed by expert service and honest guidance. We take the time to understand each project's specific needs, recommend the right fit, and follow through with clean, professional installs.

Whether you need one **high-speed coiling door** or an entire facility fitted with **custom steel doors and grills**, we're the team to call.
